

ThriveCart + Brevo + Perspective Funnel Automation System

Project Overview

Designed and implemented a complete **digital product sales automation ecosystem** by integrating **ThriveCart, Brevo CRM, Perspective Funnels, Zapier, and ThriveCart Learn**. The system automated the entire customer lifecycle, from lead capture and segmentation to purchase processing, email nurturing, and course fulfillment.

The project focused on creating a seamless experience for customers while reducing manual operations for the business team.

Business Challenge

The business was managing leads, purchases, email campaigns, and course access across multiple platforms. The main challenges were:

- Manual customer onboarding after purchases
- Lack of centralized customer tracking
- Separate workflows for buyers, non-buyers, and upsell customers
- Need for personalized email communication based on customer behavior
- Automatic delivery of purchased courses and coaching resources

Solution Delivered

Built a connected automation framework that synchronized customer data between marketing, payment, and learning platforms.

Lead Generation & Funnel Automation

- Integrated Perspective Funnels for interactive lead capture and assessment journeys
- Captured user information and funnel responses automatically
- Connected leads with Brevo for segmentation and personalized nurturing campaigns

CRM & Email Marketing Automation

- Created Brevo automation workflows for different customer journeys
- Developed buyer onboarding sequences after purchase

- Built non-buyer nurture campaigns with conditional logic
- Applied customer attributes and segmentation rules for targeted communication
- Automated follow-up emails based on user engagement and purchase status

ThriveCart Payment & Fulfillment Automation

- Configured ThriveCart product fulfillment workflows
- Automated customer enrollment into ThriveCart Learn courses
- Connected product purchases with CRM updates
- Managed additional offer and bump purchase automation
- Ensured customers received the correct access and communication based on their purchase

Zapier Integration Architecture

- Built automated workflows between ThriveCart, Perspective, and Brevo
- Synced customer records, product information, and purchase details
- Created reliable data flow between multiple business systems

Technology Stack

Platforms:

ThriveCart, ThriveCart Learn, Brevo CRM, Perspective Funnels, Zapier

Automation Areas:

CRM Automation, Email Marketing Automation, Lead Segmentation, Customer Lifecycle Management, Digital Product Delivery

Project Outcome

Successfully delivered a scalable automation system that:

- ✓ Automated the complete customer journey from lead capture to course access
- ✓ Reduced manual processing and customer management tasks
- ✓ Improved customer segmentation and personalized communication
- ✓ Connected sales, marketing, and fulfillment operations into one workflow
- ✓ Created a foundation for future digital product growth and automation expansion
